PROFESSIONAL SUMMARY

Mobile Application Developer with 5 years of professional experience in Android (Java) and Flutter (Dart) development. I build fast and user-friendly mobile apps. Experienced in building real-time GPS tracking taxi apps, eco-friendly step trackers, agritech apps, and online delivery apps. Skilled in writing clean, reusable code and designing easy-to-use user interfaces.

WORK EXPERIENCE

Senior Android & Flutter Developer

Sep 2025 - Present

Codeash Infotech, Surat, Gujarat

- TripFacts (Travel Landmarks Discovery):** Developed a location-aware travel app that displays bite-sized cultural facts and quizzes about nearby landmarks. Integrated real-time Firestore database sync and local notifications.
- Genius Insight & Quanta Capsule (Biofeedback Systems):** Engineered a wellness platform consisting of a body voice analysis app and a remote companion scanner that securely records client voice files and delivers balancing audio frequencies.
- BioVibe & iLife Infinity (Architecture & SDK Upgrades):** Overhauled two sound therapy and energy balancing suites, implementing 64-bit Gradle upgrades, 16 KB page-size compatibility, and advanced multi-language audio compilations.
- GYDO (Social Messaging Portal):** Built a social networking app for discovering events and real-time chatting with friends. Integrated live username validation APIs and dynamic message emoji picker libraries.
- Odyssey & Rife Companion Apps (System Modernization):** Upgraded a guided meditation timer app and a Rife natural sound frequency player to target modern Android SDK 36 and modernized the physical back-navigation handling.

SKILLS & TOOLKIT

Tanna Infotech, Surat, Gujarat

- **YourTaxi (Taxi App):** Worked on a native Android taxi booking app used in Switzerland. Added Mapbox maps for directions, live location tracking, and driver safety checks.
- **Grow-Trees (Step Tracker & Tree Planting):** Worked on an app that counts daily steps to plant real trees. Set up secure payment checkouts, offline reports, and GPS-based tree verification.
- **OnePlay (Cloud Gaming App):** Built the Android client app for cloud gaming. Made a virtual on-screen game controller and set up fast video playing tools to ensure smooth gameplay.
- **Phyfarm (Smart Agriculture App):** Worked on a smart farming app. Built Wi-Fi setup tools for farm devices, sensor charts to display live data, and buttons to start watering systems remotely.
- **IMPCA (Field Survey & Mapping):** Programmed a map-focused app for field agents. Built map features where users can draw farm areas on Google Maps and save plot coordinates offline.
- **AICS (Cargo & Logistics App):** Created a booking and tracking app for domestic and international courier shipments. Added barcode scanning, price calculators, smart locker bookings, and document scans.
- **QuickDesign (Marketing Post & Card Maker):** Designed an app to create marketing posts and greetings. Built simple photo/video editing tools and premium templates.
- **App Improvements:** Updated old designs to modern layouts, making apps load 30% faster and maintaining 99.8% crash-free sessions.

Freelance & Open Source Developer

Independent Contractor & Personal Projects

- **Ziflora (Floral Delivery & Vendor Platform):** Developed an on-demand floral commerce platform featuring dual apps (User & Vendor) live on Google Play Store. Built quick checkout with Razorpay, real-time order tracking using Firebase, and mobile number OTP login using MSG91.
- **Open Source Custom Packages:** Created, tested, and published personal Flutter packages (`scroll_to_position` and `truncate_text`) to pub.dev to simplify programmatic scroll control and responsive layout management for the developer community.
